Rohith Naidu V

```java
package com.letsupgrade;

public class Main {
    public static void main(String[]args) {

        Employee e=new Employee();
        e.display();

        Employee e1=new Employee();
        e1.display();
    }
}

public class Employee {
    String name="Rohith";
    int age=22;
    String city="mysore";

    public void display() {
        System.out.println("The name is "+name);
        System.out.println("The age is "+age);
        System.out.println("The city is "+city);
        System.out.println();
    }

}
```

Output:

```
The name is Rohith
The age is 22
The city is mysore

The name is Rohith
The age is 22
The city is mysore
```
